

# Park Facilities Designer

## To Meet Tax Proposal:

overall space needed (total area):

Defined borders (with sidewalks and parking to separate areas: ball fields, pool and park land)- Perimeters of each part of park (fenced or not)

## Things to consider adding (other park facilities/amenities):

play structures (area and perimeter for border)

green space (area of 'free' green space not being used by facilities)

skate park (area)

disc golf (distances of holes marked)

picnic structures (area of structures)

benches (total count, location)

paths/trails (distances of trails marked)

tennis courts (area)

sand volleyball (area)

Other:

**Land is purchased or described in size by acre.**

*A square enclosing one acre is approximately 69.57 yards, or 208 feet 9 inches (63.63 meters) on a side.*

*As a unit of measure, an acre has no prescribed shape; any area of 43,560 square feet is an acre.*
